

SKYETEC'S MOLD ASSESSMENT SERVICES

Important Information You Need to Know About FLORIDA'S MOLD LAW

Purpose

The licensure and regulation of mold assessors and remediators has been in effect in Florida since July 1, 2010. This law was put in place to protect consumers against fraudulent and unqualified mold companies, and from conflicts of interest which can arise from the same entity performing mold assessments and mold remediation.

It is very important before choosing a mold inspector that you verify he/she has an active State of Florida license. Enforcement begins on July 1, 2011.

Overview

- Mold inspectors must obtain and maintain an active State of Florida mold assessment license
- Mold assessment and remediation must be performed by separate companies having no financial relationship whatsoever
- A home inspection license does not qualify an individual to perform mold testing or inspections
- Mold Inspectors are screened for prior criminal history and must pass an FBI background check
- Mold Inspectors must carry \$1 million in errors and omissions and general liability insurance
