

eInspections Remote Manager

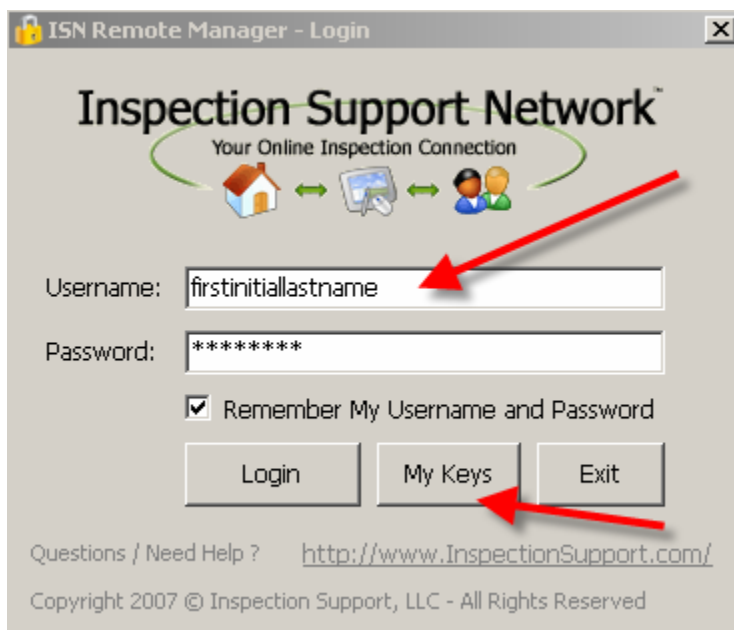

The Remote Manager:

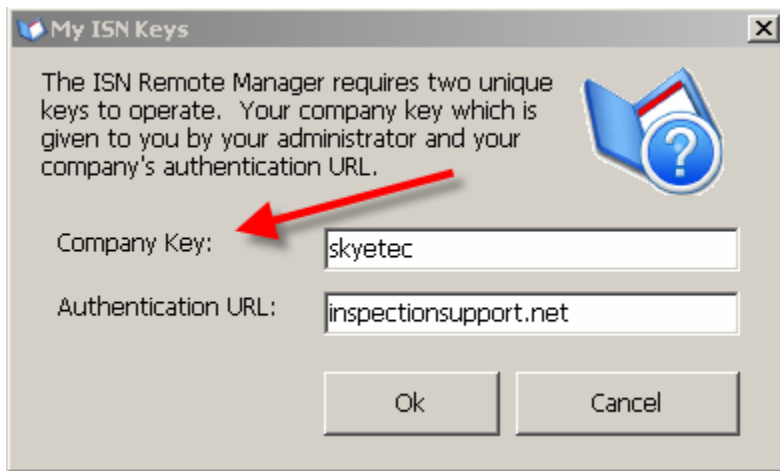

ISN Remote Manager

The Remote Manager is the go-between transfer tool to get the inspection data and report from the ISN to the eInspections™ software, and then back into the ISN after you've completed the report. The desktop icon appears when you install eInspections on your computer.

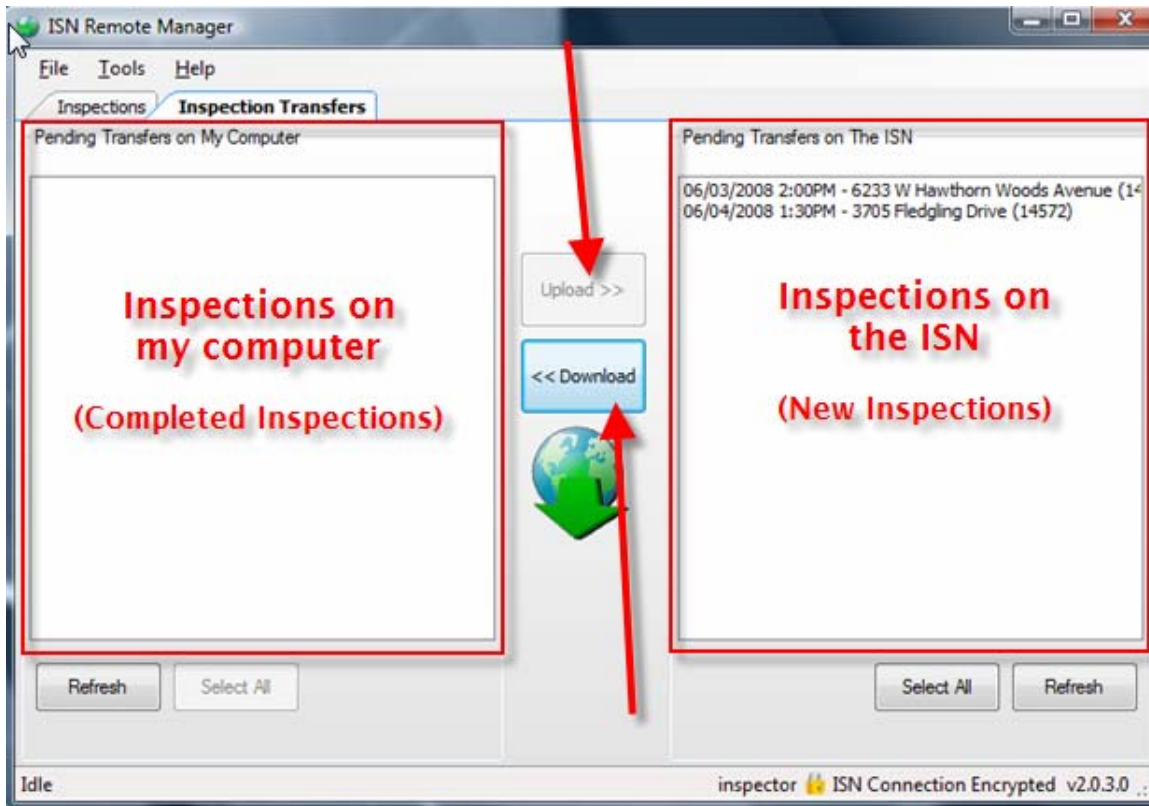

Double click on the icon to begin. Your username and password are the same as your ISN username and password.

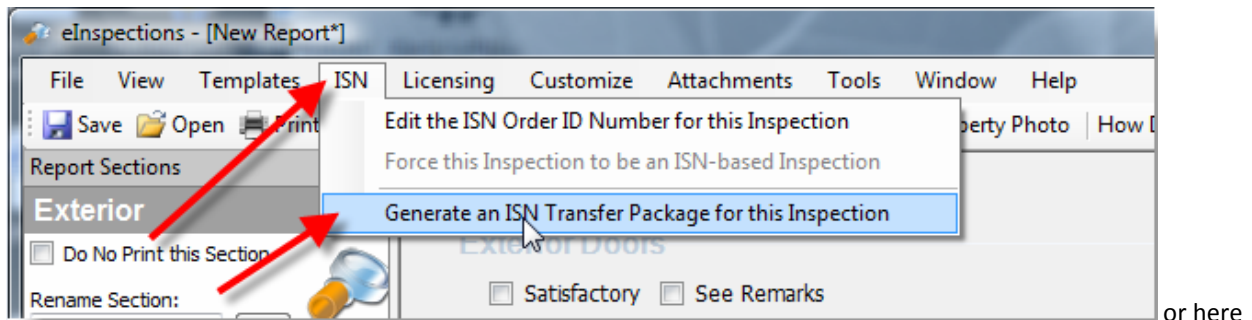

THE FIRST TIME YOU RUN THE REMOTE MANAGER... it will prompt you for your company key... this is **skyetec** all lowercase with no spaces!

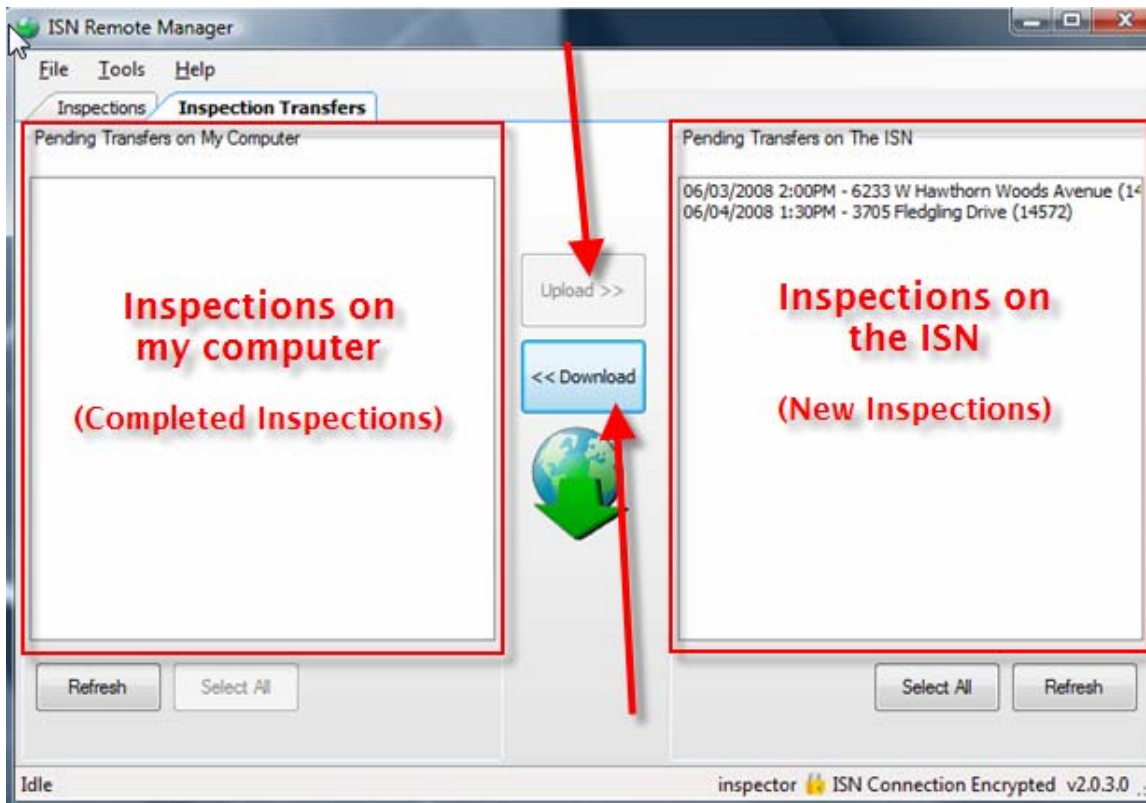

You will receive your new inspection orders on your Remote Manager. Under the tab "Inspection Transfers", click on the new orders on the "Pending Transfers on the ISN" and they will then be found in your My Documents folder. Open up the specific job order and complete your inspection.

After you finish your report on eInspections™ you will “generate a transfer package” so you will be ready to then upload your finished report to the ISN using the Remote Manager.

After your inspection is completed and you have generated an ISN Transfer Package, open Remote Manager and click on “refresh” on the left side. Then choose the file you wish to upload, click on “upload” and your completed report is now online on the ISN, attached to the appropriate OID/work order.
